

Vista Clara Geophysical Service Capabilities in Western U.S.

You may not have known that the world's leading developer of advanced Magnetic Resonance (MR) Geophysical tools also provides comprehensive data collection and analytical services onsite.

With the unique expertise to analyze and interpret MR data, Vista Clara offers this advanced MR capability alongside other proven techniques for a complete geophysical solution. We are happy to offer this service either to compliment your existing regional provider or provide a stand-alone solution for new investigations in our vicinity.

Magnetic resonance products are used worldwide by professionals in hydrogeology, environmental remediation and geoenvironmenting to reduce project risks, lower costs and improve outcomes. You can save time, money and the hassles by utilizing our high value services to collect or integrate your data to meet your needs.

Our expert geophysical data collection and analysis services for investigations can be applied to:

- Groundwater resource development and management
- Environmental Investigations
- Geoenvironmenting

From our headquarters in the Seattle, WA area, we can bring the highest level of professional service to currently under-served field support requirements anywhere across the Western USA and British Columbia.

For more information about how we can serve you in this region, please feel free to reach out.

Dave Walsh, PhD, CEO of Vista Clara
